Q2. What are addressing modes define each one of it with example

There are 3 modes

- Register mode
- Imidiate mode
- Address mode

⇒ The register mode which have 2+2 as 22 as oprends and + as opcode is called register mode.

⇒ In indirate mode the operation which has constant in it as movdl, 2. is called imidate code.

⇒ Address code is I opreand is in memory address is cadled address mode.

Q4. MOV AL, 5

Imdiate as it has constant.

MOV AL, BL

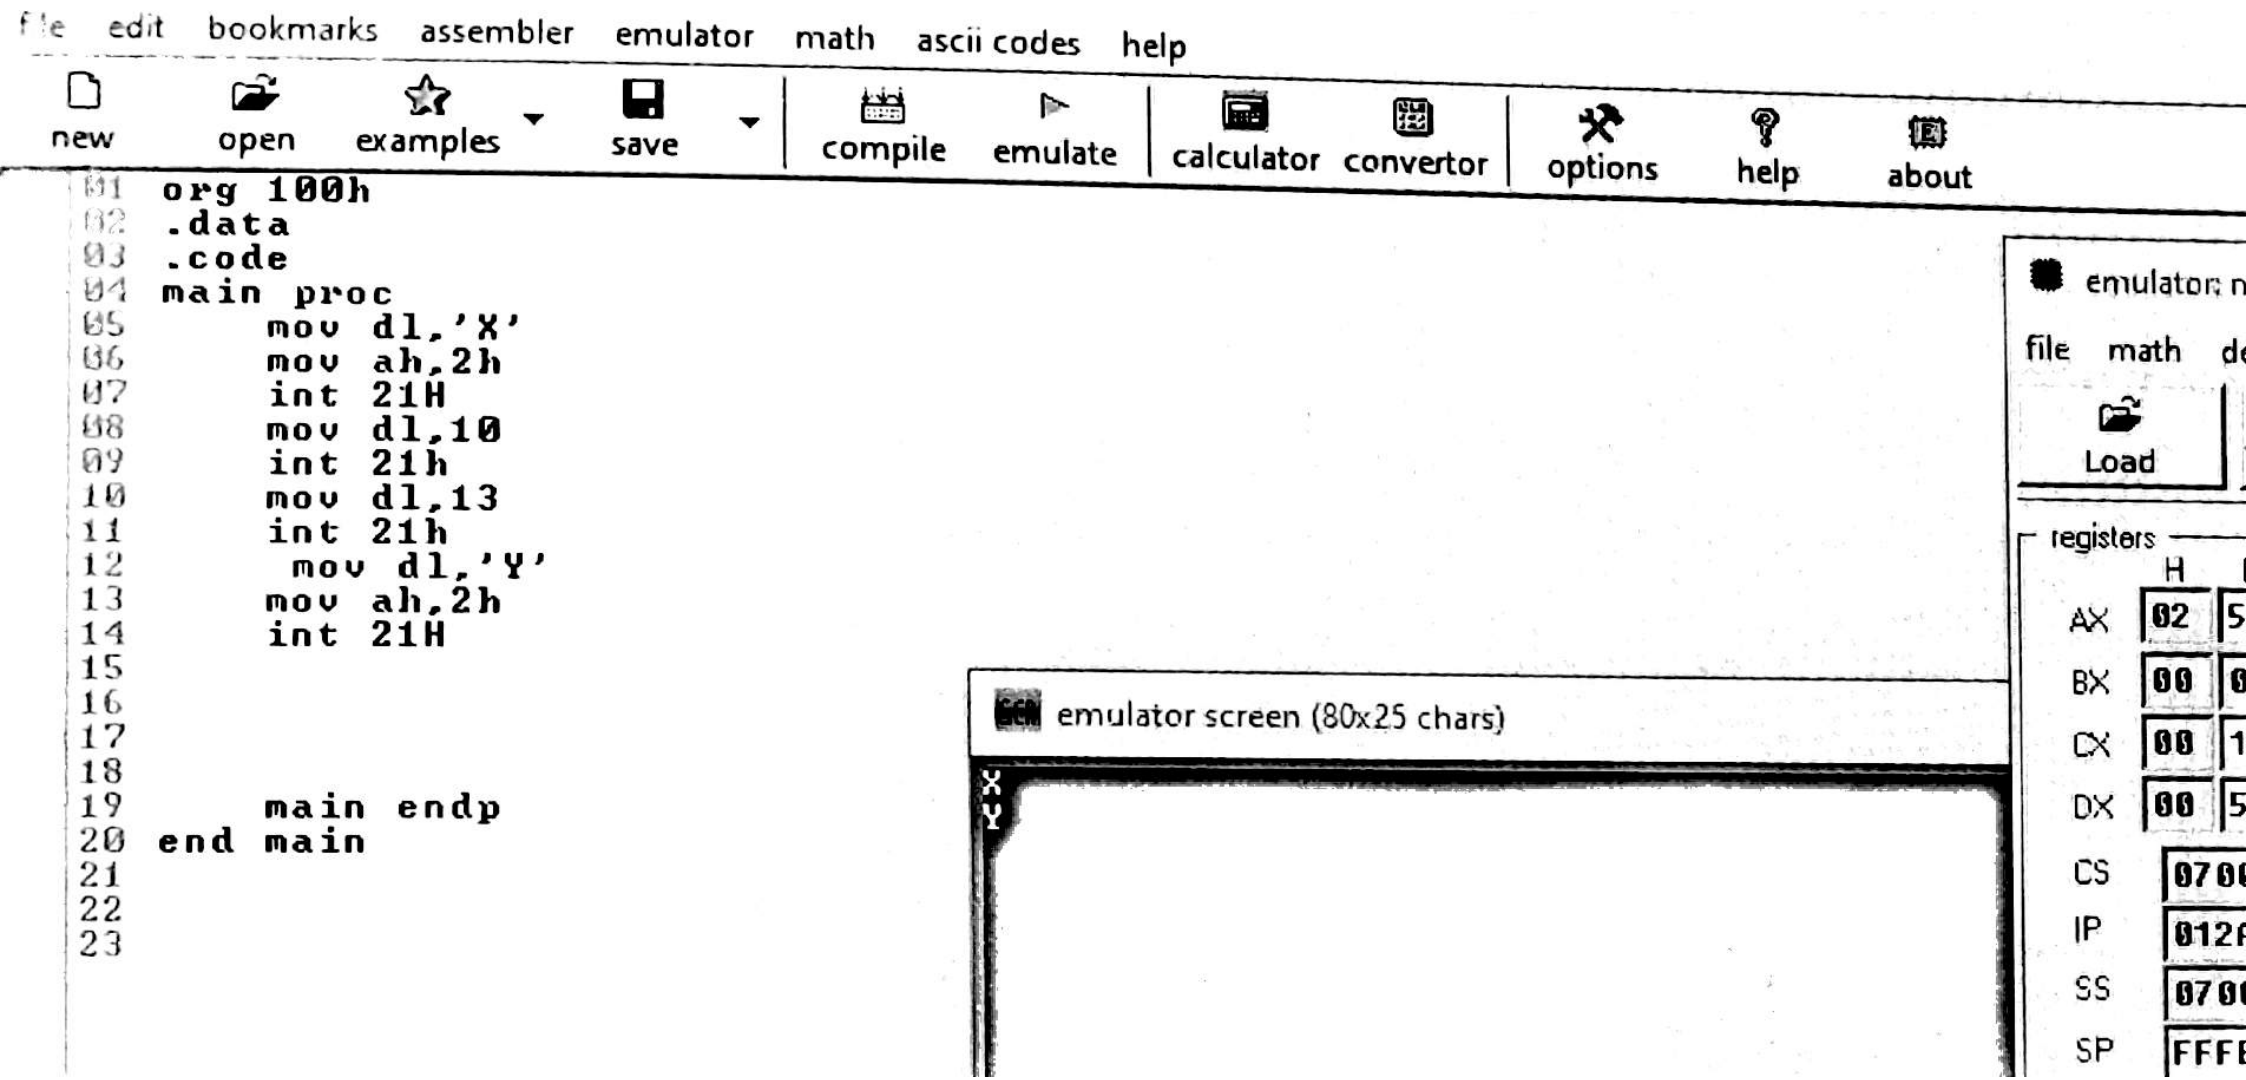

Imidate as it has constant.

MOV AL, [NUM]

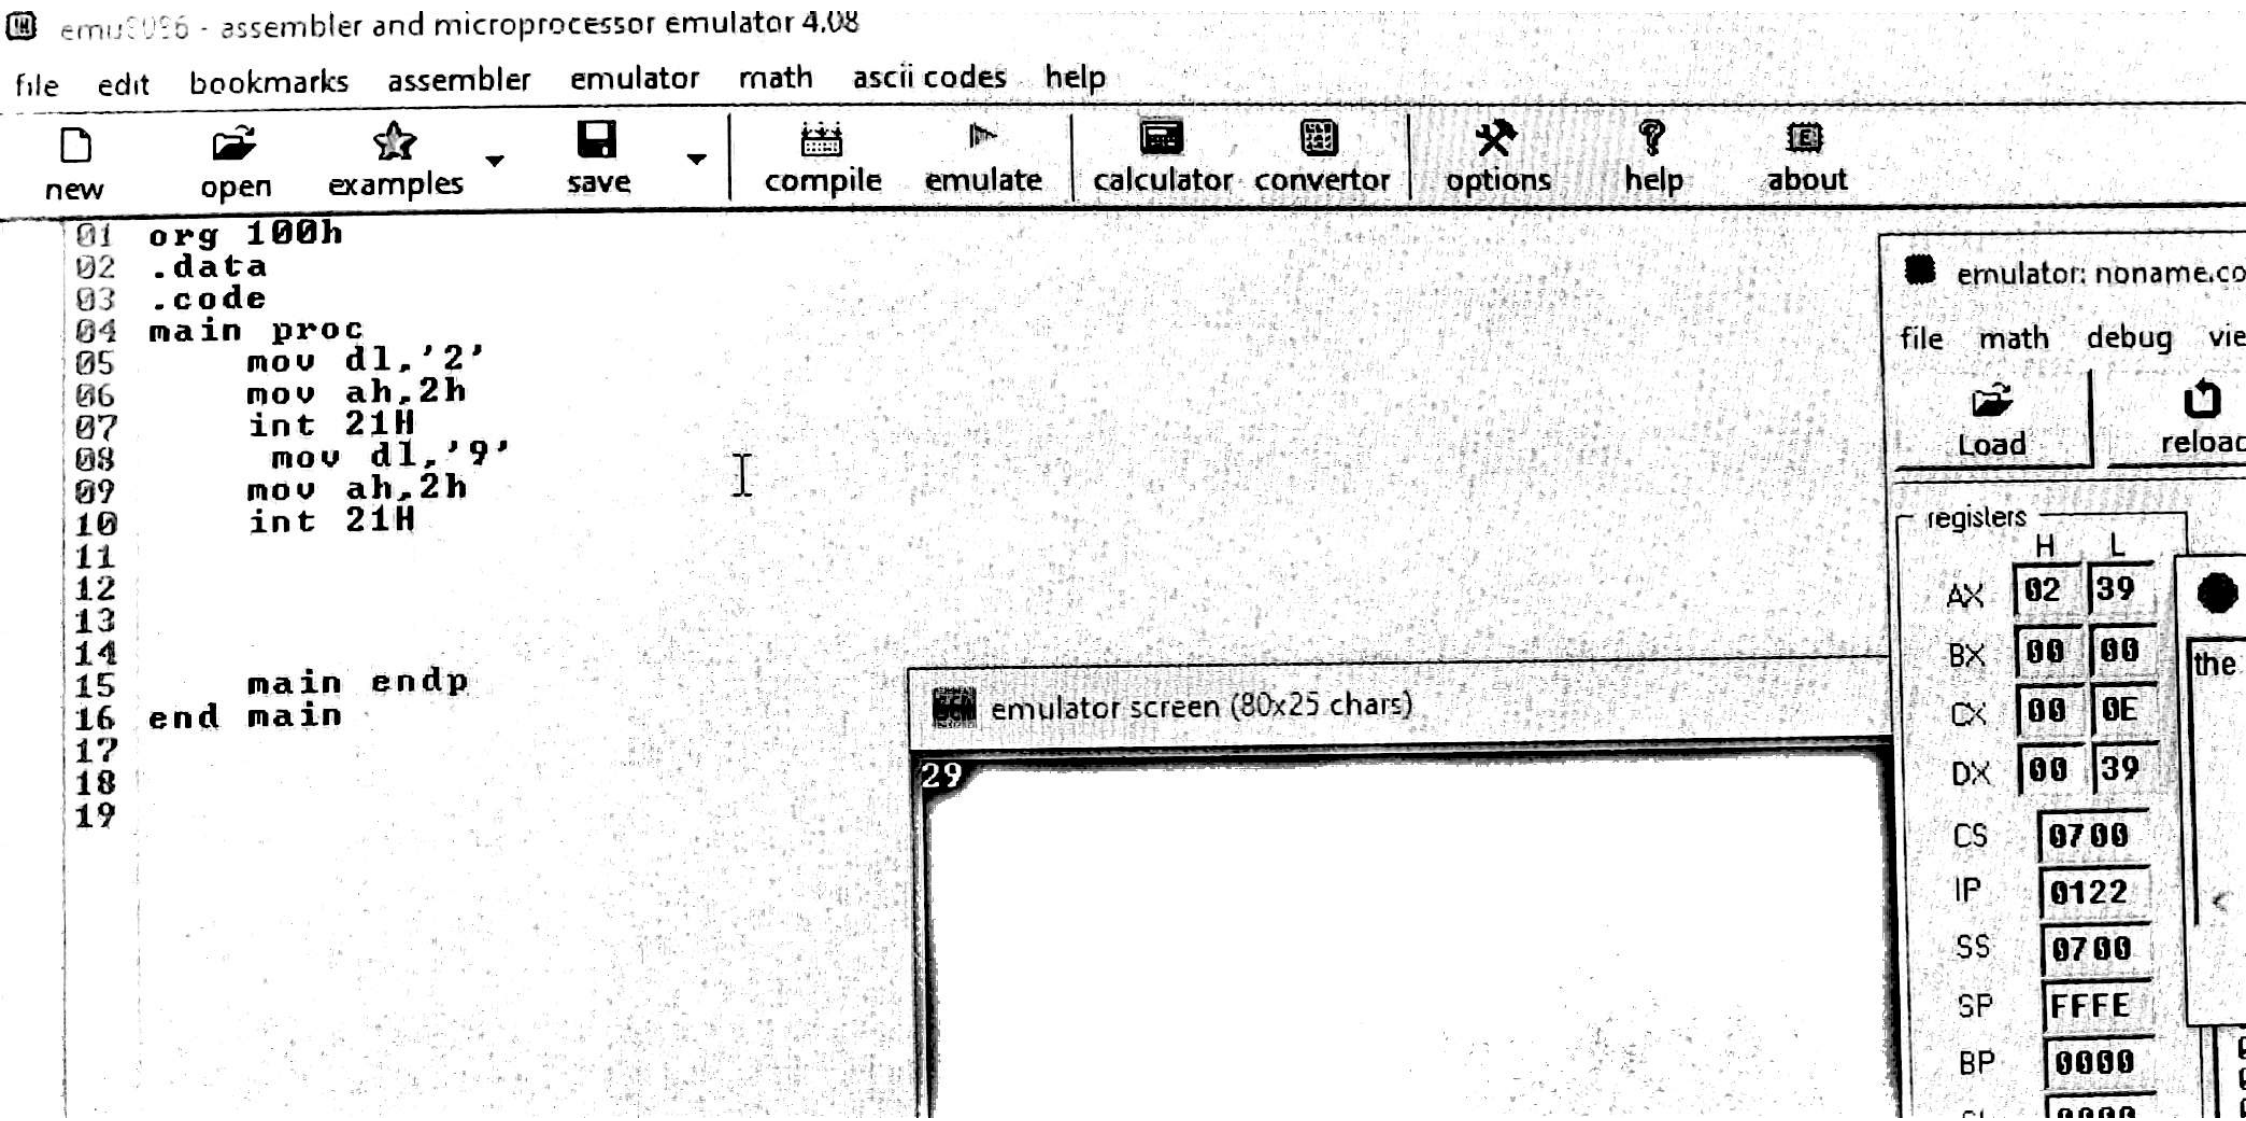

Address mode

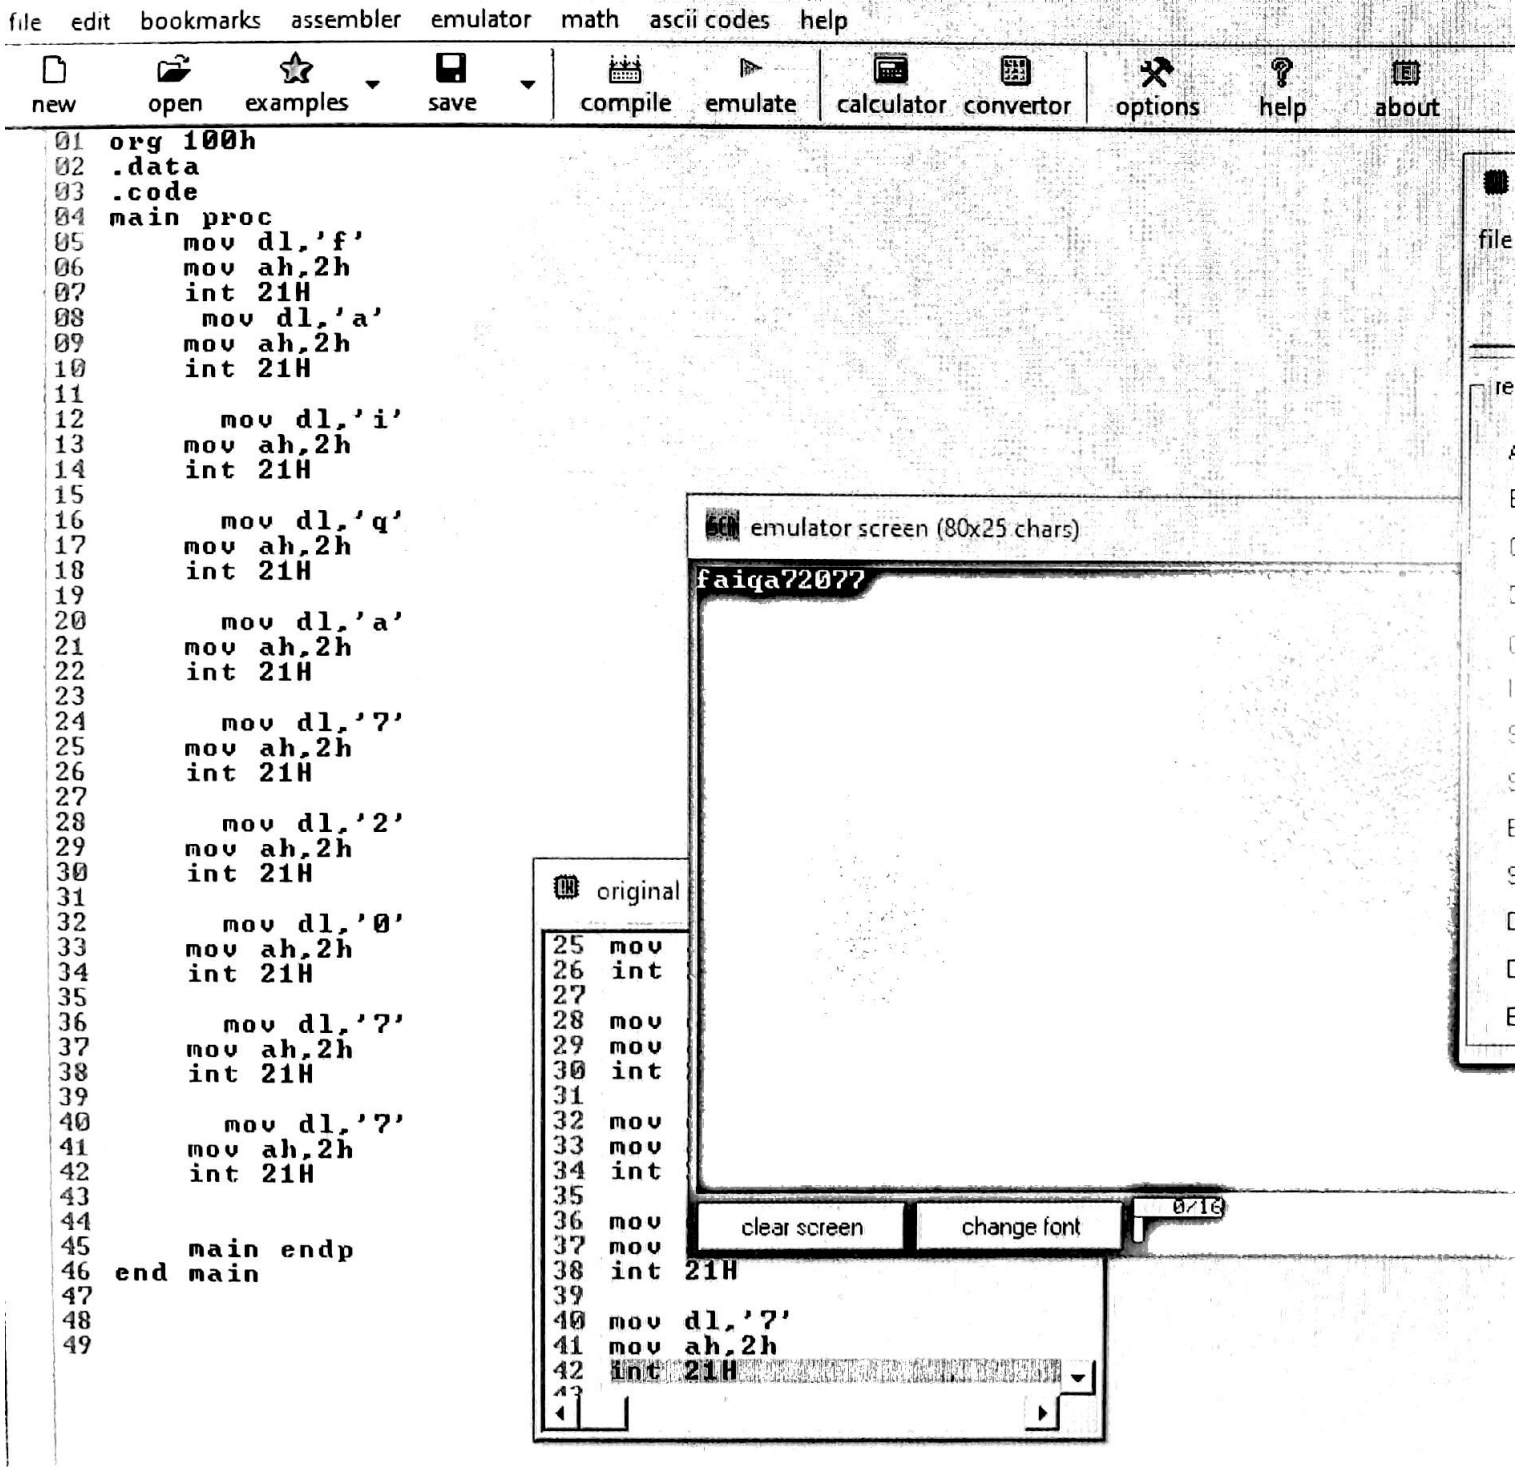

MOV AL, [SI]

Address mode.
